Turn your outdoor rink into a championship ice surface with the easy to use, fast, efficient tractor mounted resurfacers from OLYMPIA

Operating the OLYMPIA 250 or 500 series ice resurfacers is a study in simplicity. The resurfacing controls are within easy reach of the operator. Once the resurfacer is engaged it is a matter of driving around the ice surface. The ice is scraped and the galvanized steel flood pipes and towel bar provide for a smooth even surface.

Maintenance of the OLYMPIA 250 and 500 series is simple and straight forward and can be handled easily by your staff.
